**1901 News from the Whitehorse Star
 Supt. Tache in Dawson
 Will Investigate Building
 Of Cold Run Trail**

Talks Of This Winter's Work On Lake LaBerge

Mr. J.C. Tache, Superintendent of construction in the public works department of the Yukon, left White Horse for Dawson January 13th and arrived in that city after 11 days travel. Mr. Tache, in an interview published in the Dawson News of the 25th, says:

"The trail between White Horse and Dawson is in fairly good condition and freight is coming through by teams in good time. Quite a number of the roadhouses along the line are not giving the service they should. Something should be done to see that they provide travellers with better accommodations.

"I have come to Dawson to investigate the building of the 15 miles of trail to Gold Run, which was done by Palmer Brothers under contract. The road, I am advised, is not according to specifications, hence my visit to investigate.

"The only public work which I have under way during the present part of the winter is the improvement of the head of Lake LaBerge for summer navigation. Several long dams are being built to confine the waters into one channel and prevent them from longer spreading over the wide area of sand that they now cover. In pursuit of this work I have this winter employed 30 to 45 men, three teams and a pile driver, and have driven 1100 piles. One of the dams is 2400 feet long, another 1400 and a third 400. The shorter one cuts the water off from running behind a small island.

"The dams are filled with brush and stone. The work of filling will begin in March. A large amount of stone has already been hauled. The piles used were cut in the vicinity and are driven 14 to 16 feet in the ground.

"In connection with the camp at Upper

LaBerge we have a mess house, blacksmith shop and other buildings.

"Other proposed improvements on the river have not been authorized at Ottawa. The proposed cut-off from Selkirk to the head of Gold Run would not, I believe, save so much time to those traveling between Dawson and White Horse as a cut-off that would avoid traveling over Lake LaBerge. The lake remains open late and delays travel. The Selkirk Gold Run road would also be quite expensive.

"Work done by my men this winter includes two trails from the White Horse copper district, one six miles long and the other four and a half, both of which are finished to the White Pass railroad.

"The White Horse Board of Trade sent an engineer out to survey a route for a road to the Big Salmon mining district. He reported that a road could be built which would be 49 miles between White Horse and Livingstone creek. The distance by river to the district is 139 miles from White Horse. The citizens of White Horse got up a petition for a road over the route mentioned and I forwarded it to Ottawa without recommendation."

The News reporter must have misunderstood Mr. Tache in regard to his attitude on the Big Salmon road. Mr. Tache was enthusiastically in favor of any improvements looking toward the betterment of White Horse, and when the petition of our citizens for a road to the Big Salmon was placed in his hands by a committee from the White Horse Board of Trade, appointed for that purpose, he signified his intention to them of strongly recommending an appropriation for the same.
