**Telephone Service**

The next public improvement to be inaugurated in White Horse will be a telephone system. Already the wires have been strung, the switch boards placed in working order and the receiving instruments will be installed next week. The work now being done is of a private nature, but when completed will in all probability be absorbed and become a part of the Yukon Electrical company.

The system being put in is what is known as the Strowger Automatic Telephone, one of the latest and most up-to-date known, by the use of which absolute secrecy is guaranteed to every patron of the line. Each telephone has an automatic sliding dial by turning so that the figures on the dial correspond to a plate beneath. The sender can be automatically connected with any other instrument on the circuit which he may desire. Should the line be in use, connection cannot be made, a

knowledge of this being conveyed to the one wishing to use the same by a slight buzzing sound.

The Strowger Automatic telephone does away with a receiver at the central office. While a message is being sent the central office is disconnected the same as other phones on the circuit, and there is no danger whatever of any communication which you wish to make being conveyed to disinterested parties.

The Strowger Automatic telephone is rapidly replacing companies in the east where central telephone operators are employed, and there is now being formed in Chicago a company with \$5,000,000 capital to put in the system in that city.

The rules for the telephone will at the commencement be \$10 per month for business houses and \$5 per month for residences.

**A Freak Snowslide**

Everybody in this section of Yukon Territory and in Posey County, Missouri, knows Mr. J.P. Whitney of Whitney & Pedlar. (He always says, "You'll have to show me!") Mr. Whitney has ever been up-to-date in his efforts to make White Horse a modern city with fire-proof buildings, wider streets and plenty of sidewalks. Last November he conceived the idea of adding an extra chimney to his big building and, regardless of freezing weather, engaged a man to do the work. The chimney was built in symmetrical form but, owing to the fact that the weather was not propitious, the mortar failed to stick to the bricks, and become frigid and wholly at home with itself.

Previous to the building of the chimney Mr. Whitney had dug a well on the

side of the building where the new chimney was erected and this was covered over with boards.

Last Monday ended the checkered career of the new chimney. A large mass of snow had accumulated behind the smoke avenue and on that day decided to move to terra firma. On its way down it picked up the chimney and the whole landed on top of the covering over the well. The boards were light and snow, bricks and mortar went through to the bottom, nothing remaining except the cavity through which it all passed.

Mr. Whitney will rebuild his chimney, but he will not do it in cold weather, and is now giving out the story that he has the only well in the Yukon Territory with a chimney in it.
